On site procedures have been introduced to prevent the spread of COVID-19 and reduce the potential risk of exposure to our workforce. These measures include and are not limited to:

- Facilitating staff working from home wherever possible, thereby minimising the number of staff on site at any one time.
- The upgrading of our cleanliness & audit procedures across all our workstations and offices, focusing on areas with high traffic, shared facilities, toilets & kitchens to reduce the risk of cross-contamination.
- The provision of frequent information & guidance about reducing the transmission of coronavirus (COVID-19) electronic communication & continuous dialogue.
- Providing washing stations and anti-bacterial hand gels to staff and visitors, with revised hand washing instructions in line with NHS guidelines, accompanied by a promotional campaign on the importance of hand washing.
- Making available PPE options gloves, ear defenders, workwear etc, as well as providing antibacterial sanitsers and wipes.
- Providing a clear plan of action should any person become unwell at work, both in terms of their treatment & the steps required to protect their colleagues.
- Restricting on site visits to by agreement only and to ensure complience with our on-site procedures.
- Our plans are regularly monitored and are reinforced daily through ongoing dialogue & teamwork.

Throughout this unprecedented situation our preventative measures have received total support from all our workforce, & we will continue to work with them to protect their safety & provide our same levels of service.
